Skills

Cloud	AWS, Azure, GCP, Docker, Kubernetes, Helm, ArgoCD, Grafana, Prometheus, Kafka, Fluentd, Falco, Kong, Cilium, Istio...
DevOps / SRE	Terraform (OpenTofu), Ansible, Puppet, Jenkins, GitHub, GitLab, Dynatrace, Datadog, Sumo Logic, PagerDuty...
Coding	Java (Spring, Quarkus), Python, Typescript (React, Nextjs, Nodejs), Golang, Bash, PHP

Experience

Solutions Engineer, Corporate (EMEA)

Netherlands (remote)

GitHub

2024 - now

- Moving the pre-sales motion for SMB customers up to 1000 developers;
- Close collaboration with Sales and Post-sales team;
- Supporting GitHub customers, translating business requirements into robust architectural designs and successful implementations;

Founder

Europe, EU (remote)

SyncTune (self-employed) - here for details

2021 - now

- Consulting and advising a range of companies from startups (Pre-seed, seed, Series A) to public companies;
- Cut 30-40% of cloud costs optimizing storage, compute configuration and egress traffic, contextually improved app performance by 15-20%;
- Lowered bugs and incident impact of about 30% via implementation of CI/CD, monitoring, alerting and DAST/SAST techniques;
- Delivered DevOps and Kubernetes courses to more than 100 alumni with a surveyed CSAT of 95%;
- Offering DevRel and advisory services for startups (including YC funded ones);

Chief Technology Officer (co-founder)

Netherlands (hybrid)

KubeLab

2022 - 2023

- Laying down the foundation of the internal Kubernetes Platform, from idea to MVP, driving both tech and business strategy;
- Engineering management of 7 remote engineers, external relations with potential investors and stakeholders, 200k € pre-seed raised;

Staff DevOps Engineer | Site Reliability Engineer

Italy (hybrid)

InfoCert (Tinexta Group)

2018 - 2021

- Lead of a 5-people DevOps Engineering team, managing cloud infra for a product with 8+ million daily users in EU, NA and LATAM;
- Saved an estimated of 10M+ € in costs avoiding SLA breaches when operating as SRE;

Senior Software Engineer

Italy (on site)

Various IT Companies - here for details

2015 - 2018

- Worked for a number of IT companies, in different verticals, mostly as fullstack PHP (Laravel), Java (EJB+JSP) and Linux sysadmin;

Projects

Kubernetes Open Source Release Team Member

kubernetes/kubernetes

- Comms Release Lead for Kubernetes v1.32 - coordinating both external and internal comms with various stakeholders including media.
- Comms Release Shadow for Kubernetes v1.31.

International Speaker - Event Organizer - Lecturer

Community Work and Public Speaking

- Speaker, program committee and organizer of numerous events in the Cloud Native space - Guest Lecturer at the University of Turin.

K-Lab - Utility CLI to help you manage k8s clusters in a consistent way

mbianchidev/klab-cli

- Open-Source project, integrating k8s, public cloud specific APIs and Terraform to simplify Kubernetes management across clouds and tenants;

Platform Engineer for ChangeGamers - Computational Pathology Research

Nederlandse Kanker Instituut - Antoni van Leeuwenhoek (NKI-AVL)

- Supporting computational pathology and ML/AI workloads to train image pattern recognition models on biopsy data on Azure

About me

I am a martial artist, willing to go far to reach my objectives; an eSport enthusiast able to lead my team to victory and equipped with a fast reaction time to any change; a tech blogger with a passion for personal finance able to plan for the long run; a singer, vocal coach and musician, naturally inclined to find creative solutions to complex problems.
