SUMMARY

I like to introduce myself as an agnostic and versatile engineer with a deep passion for well-written code and automation. I also love coaching and mentoring people because I strongly believe in knowledge as the only way to get rid of technical debt and develop new and game-changing products. You can find out more about me in the links and below, enjoy your stay! :)

WORK

IT Freelancing / Lug 2021 - ongoing

I work with companies that believe in the value of the people they work with by rewarding them with trust; companies believing in work-life balance and having a tech first vision. My goal is to bring value to your business by crafting quality software, choosing the best techs for your use-case, enhancing & optimizing your processes, implementing good practices and boosting your team(s) knowledge base. Offering software development craftsmanship, DevOps, SRE and cloud management services; I also teach DevOps/SRE courses tailored to your business and IT needs.

IT Consultancy / May 2016 - Lug 2021 (5 years)

Worked in both short and long term projects for a wide pool of customers in many kind of dev teams. Learnt about the Java world and Spring in particular, always keeping an eye on the cloud. Dealt with various aspects of dev: technical doc writing, code reviewing, collaborating to ensure scalability, reliability and security of the developed solutions. As DevOps my daily focuses were: IaC, monitoring, test automation, CI/CD and cloud orchestration/management. Always had sysadmin level privileges and responsibilities while ensuring SLA compliance by designing solutions to remediate, mitigate and prevent incidents to improve services.

SKILLS

Dev Tools: Java 11+, Spring framework, Bash, Python, Node.js
DevOps Tools: Kubernetes, Docker, Helm, Flux, AWS, Azure, Puppet, Terraform, Jenkins, Artifactory, GitLab
Other: CI/CD, Version Control, Cloud management, Automation, Monitoring, Atlassian suite
