Summary

I like to introduce myself as a versatile engineering manager with a deep passion for DevOps culture, well-designed architectures and Cloud Native technologies. You can find out more about me in the links and below, enjoy your stay! :)

Experience

CTO @ KubeLab / Dec 2022 - now

I joined KubeLab because I believe in its values, our mission is to enable courageous people and businesses to make a positive impact on the world, through technology. Creating bridges between businesses and our continuously improving products, while ensuring a smooth development experience for our users is one of my stronger drives.

Freelancing / 2021 - 2022 (2 years)

Provided consultancy to various companies, mainly in the DevOps and SRE areas from both a technical and a managerial point of view. I've taught courses in companies from different industries and with different sizes and learnt I love to see their evolution through time.

Consultancy / 2016 - 2020 (5 years)

Worked in both short and long term projects for a wide pool of customers in many kind of dev teams. Learnt about backend engineering, growing into the Software Engineer I'm today while always keeping an eye on the cloud. Became a DevOps and SRE. Documentation, code reviewing, collaboration, ensuring scalability, reliability and security of the developed solutions have been my obsession. Focused on IaC, monitoring, test automation, CI/CD and cloud orchestration/management.

Skills

Dev: Python, Node.js, Reactjs, Java 11+, Spring framework, Bash

DevOps: Kubernetes, Docker, Helm, FluxCD, AWS, Azure, Puppet, Terraform, Ansible, Jenkins, GitHub, GitLab (and more)

Management: Engineering Management, Project Management, Tech Budgeting

Courses

- Automation with Ansible - RedHat - 2022
- RedHat System Admin I & II - RedHat - 2022
- CKA/CKAD - CNCF - 2020
- Google DevOps - 2020
- AWS Solution Architect Associate - 2019

A bit about me

I'm a combat sport amateur (Kickboxe K1) willing to fight for reaching my objectives, an eSport enthusiast able to lead a team to victory. I also sing in metal bands and produce electronic music to unleash my creative flair. I also love game developement, mainly 2D. I streamed on Twitch.tv from time to time but never consistently. Sometimes I blog about techs or anything that comes to my mind, I travel often, I love tech conferences and connecting to people!
